[2013-02-15 Rec and Com vessel expenditure stats for Orcutt.xlsx](#)

Hi Jeff,

I was out for our Thanksgiving holiday last week. Here are some cost statistics we put together in 2013 for the legislative session. Broken down by whether the vessel was built as commercial (Com) or recreational.

If the vessel is under ~45' and metal then costs are less if it can be scrapped whole but most of the time the metal vessels are commercial and also have lots of asbestos, PCBs, lead that have to be abated so they are actually more costly.

Subject: Vessel Disposal costs in Washington

Hello Melissa,

Do you have handy an estimate (or typical range) of how much it costs to dispose of a vessel under the Derelict Vessel Removal Program? If the vessel is recycled instead of disposed in landfill, do the net costs change? Hoping you have this handy somewhere...

Thanks.

Jeff
